

Model 315 Sprocket-Trak

Reliability.....Performance.....Value

*Allen's 15"
sprocket driven
plotter delivers speed,
accuracy and precision.*

Reliability...Un-attended...with all punched media

- ◆ Allen engineered a new dynamic tracking system: Sprocket-Trak. It assures Un-attended productivity. With 16 pins engaging the material at all times, material handling is fast, smooth and faultless. And, the 315 will process all 15" punched media regardless of punch pattern (three-hole; slotted and uniform (IBM)). No material choice restrictions.

Performance... with Speeds up to 37 ips

- ◆ Operation is simple, fast and anxiety free! All settings are fingertip controlled. Cut force and speed are adjustable "on-the-fly". There are no exasperating menus and sub-menus to work through. With cutting speeds up to 37 ips and acceleration up to 4 Gs, productivity is maximized.

Versatility...Cut, Draw and Pounce!

- ◆ The 315 Sprocket-Trak uses Allen's exclusive Gold Touch cutting head providing a selectable cut force range of 10 grams to 550 grams. With the optional Pounce Kit you'll have control over hole size and spacing...another Allen exclusive!

Compatibility...Keep Your Design Habits

- ◆ The 315 Sprocket-Trak is compatible with all leading sign making software design programs. Its on track with how you like to work...and it gets it done faster!

Allen Datagraph Cutters...always A Cut Above the Rest!
