

# HOT TIP OPTION

## ADSI's Exclusive HOT TIP OPTION

The Hot Tip Option is a digitally controlled cutting stylus that "heat-cuts" and edge seals your material at the same time! It will process a wide selection of media that can not be processed by a standard sign plotter. The *i-TECH* Cutter w/Hot Top will process with knife-cut precision while simultaneously sealing the edge of the material. It is fast, precise and reduces labor and handling costs.

### Allen Hot Tip Option... cuts the un-cuttable!

- Highway/ Traffic Sign Materials
  - ◆ Highly Reflective Sheeting, like...  
3M Diamond Grade™
  - ◆ High Intensity Reflecting Sheeting
- Woven Synthetic Textiles
  - ◆ Tackle Twill
  - ◆ Nylon
  - ◆ Polyester and more
- Sign / Graphics Media
  - ◆ Laminated Digital Prints
  - ◆ Whenever a sealed edge is required

Easy-to-use Digital Controller

### The Hot Tip equipped *i-TECH* Cutter... does the job with speed and precision!

Cutting Diamond Grade

Allen's Digitally Controlled Hot Tip combined with the precision of the GoldTouch Head delivers the accuracy, speed and control you need to process those special materials. Using the system is simple...we pre-test and calibrate each system at the factory. Changing the settings to process various materials is as easy as adjusting the Speed and Force settings. The cutter's intuitive control panel keeps it all very friendly!

When your ready to go from Hot Tip cutting to knife cutting, or pen plotting, or pattern pouncing... just change the tool! Its that easy!

### The Allen *i-TECH* Cutter's are... *Intelligent - Intuitive - Industrious*
