

SmartMark™

The Contour Cutting Solution for Large Format Printers

Allen Datagraph Systems, Inc is pleased to announce the release of its newest cutter innovation for sign and graphics large format print professionals, **SmartMark**

Now, when you want to print and cut you don't have to struggle, hassle or fiddle around trying to make incompatible equipment perform with flawless compatibility.

SmartMark Equipped cutters are the path to efficiency.

*You create the "dots"... **SmartMark** connects them!*

SmartMark is a target acquisition option for Allen cutters. It automatically scans printed registration marks and launches the contour cut process. It can scan up to 3 registration marks and accurately adjust for scale and/or skew. Just place the **SmartMark** sensor near the first registration mark and the system will automatically acquire the target(s) and commence contour cutting.

Independent, Compatible and very Adaptable

SmartMark is not software brand dependent, yet compatible with the leading sign design software programs. Allen **SmartMark** Equipped cutters can be driven from all Windows® based design application programs, so if you can create a contour cut file in your Windows software, **SmartMark** will find its mark! It's the adaptable contour cut solution for most printer brands, types and sizes.

*All the Right **SmartMark** Equipped Cutter Sizes!*

15" . 24" . 30" . 36" . 48" . 60"
