

# Allen 536GTS

Cut monument rubber, vinyl and more with the most versatile monument cutter in the industry.

The 536GTS by Allen Cutters is a versatile, high-performance stencil cutter widely considered to be the leading brand of choice for monument fabricators.

- **Our industry-exclusive dual-drive system** uses both a friction-feed drive with four pinch wheels and a four-point sprocket drive working in tandem to ensure accurate tracking of media.
- **Easily adjustable pinch wheels and sprockets** allow the use of stencil widths from 15 to 30 inches.
- **The modern touchscreen control panel** with plain text menus and easy-to-use controls provides an intuitive user interface.
- **Compatibility with the industry's leading vector-based design and layout software programs** gives your designers the flexibility to work with any tools they choose.
- **Draw Mode** allows the use of rolled paper to create patterns used to cut shaped stones. Switch to the **friction mode** to cut, draw or pounce other materials, as well.
- The 536GTS cutting head has 100 steps of digitally controlled **adjustable force to allow cutting of all popular monument stencil materials** from the thinnest to the thickest offerings.
- **"Tangential Emulation" cutter software** allows the 536GTS to cut fine points, accurate V-lines, and square corners in even the heaviest of materials.
- An **all-metal chassis** and **well-engineered construction** provide long-lasting durability and confidence that the 536GTS will be there when you need it.

## Specifications
