

Allen GT Series

Ensure Clean, Accurate Cuts Each and Every Time

GT Sign Cutters from Allen Cutters are high-performance material cutting systems designed for daily use in professional sign shops cutting cast and calendared vinyl, printed vinyl, engineer grade reflective material and more.

- **GT Cutters include our SmartMark automatic registration mark sensor** for contour cutting large format printed graphics from any printer using Allen's DirectCUT driver and leading software publishers like CADLink's (SignLab®), SA International (Flexi.®) and Wasatch Computer Technology (SoftRIP™). The cutter automatically captures up to three printed registration marks, adjusts the scale and skew, and precisely cuts your assigned objects.
- **The modern touch screen control panel** with plain text menus and easy to use controls provides an intuitive user interface.
- **A robust friction drive with easily adjustable pinch wheels** offers superior material handling and pinch wheel placement anywhere along the carriage to simplify material setup and allow the use of a variety of material widths up to the max cut width of each model.
- **Our industry exclusive "long-tracking guide system,"** ensures accurate tracking of media over distance.
- **The cutting head has 100 steps of digitally controlled adjustable force** to allow cutting of materials from the thinnest to the thickest offerings.
- **"Tangential Emulation" cutter software** allows the GT cutter to cut fine points, accurate lines, and square corners with ease.
- **Three Modes: Cut, Draw, and Pounce** give users flexibility to work with a variety of materials, such as sign vinyl, rolled paper, and more.
- **An all-metal chassis and well-engineered construction** provide long-lasting durability and confidence that the GT Cutter will be there when you need it.
- **Cut directly from CorelDraw, Adobe Illustrator, AutoCAD, and most Windows-based design programs.**
- **Auto-Stand Option:** This automated material handling stand with motorized media feed and take-up reels ensures material flow is efficiently managed, delivering precision tracking and unattended operation over long production runs. Auto-Stand is available for the 36", 48", and 60" cutters.

Specifications

Microsoft OS compatible (version 7 or higher)
USB and Ethernet computer connections

Dimensions on Stand:

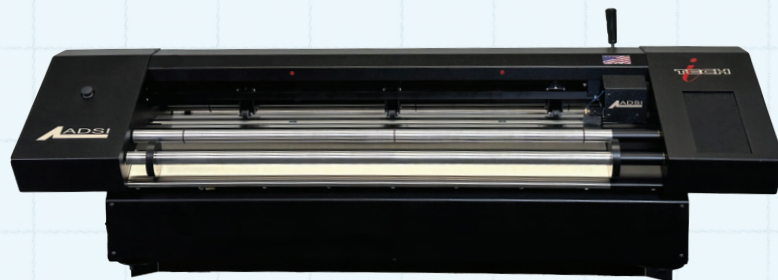

30" GT - 49" Wide x 17" Deep x 44" Tall

36" GT - 55" Wide x 17" Deep x 44" Tall

48" GT - 67" Wide x 17" Deep x 44" Tall

60" GT - 79" Wide x 17" Deep x 44" Tall
